Art Unit: 2836

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is confusing with "said power source" bridging lines 4 & 5 as it is unclear which power source is being referenced, the "power source" or the newly claimed "a second power source".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Landy (6,580,591).

It is first noted that "a 1394-compliant network of devices" is given no patentable weight as they are recited for merely intended use within the preamble and defining structure is not found within the body of the claim. Therefore, Figure 1 of Landy discloses a transceiver (100) having at least one outbound data line (Pin A or Pin B); the at least one data line connected to an electrostatic discharge line (ESD HI or ESD LO) via a diode (D1-D4). Switch (S1) connects the protection circuit to a second power source (TXVCC), said power source supplied by another device (see Col. 5, lines 38-52). The limitation, "a power source" is met by (RXVCC).

Art Unit: 2836

Applicant's arguments filed 5/27/2005 have been fully considered but they are not persuasive. Pins A & B are not for the supplying of power as alleged by Applicants; attention is directed to Column 5, lines 38-52.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
